COLOPHON

Abstract Book of the 89th European General Practice Research Network Meeting
Vigo - Spain, 17 - 20 October 2019

Editor-in-Chief:
Dr. Claire Collins - Ireland

Editors:
- Prof. Dr. Thomas Frese - Germany
- Dr. Tiny Van Merode - The Netherlands
- Assoc. Prof. Dr. Davorina Petek – Slovenia
- Prof. Dr. Shlomo Vinker - Israel
- Prof. Dr. Pemra Cobek Unalan – Turkey
- Prof. Dr. Jean-Yves Le Reste – France
- Prof. Dr. Ana Luisa Neves – Portugal

Host Organising Committee (HoC):
- Dra. Ana Clavería Fontán (Chair, Xerencia de Xestión Integrada, Galicia Sur Health Research Institute, AGAMFEC)
- Family and Community Physician (FP), Susana Aldecoa Landesa (Chairperson AGAMFEC)
- FP, Prof. Rosa Magallón Botaya (Chairperson REAP)
- FP, Leopoldo García Méndez (SEMERGEN)
- FP, Pilar Rodríguez Ledo (SEMG)
- Community Nurse, Francisco Represas Carrera (AGEFEC)
- FP, Fernando Lago Deibe
- FP, Clara Guede Fernández
- FP trainee, Antón Núñez-Torrón Núñez
- Nurse, Sabela Couso (I-Saúde Group)
- FP trainee, Rosa Belén Pérez Ramos
- FP trainee, Alba Pons Revuelta
- FP trainee, Noemí López Rey

Scientific Committee:
- Chair: Dr. Claire Collins - Ireland
- Dr. Ana Claveria - Spain
- Prof. Dr. Thomas Frese - Germany
- Prof. Dr. Shlomo Vinker - Israel
- Prof. Dr. Pemra Cobek Unalan - Turkey
- Prof. Dr. Jean-Yves Le Reste - France
- Assoc. Prof. Hans Thulesius - Sweden

Editorial Office:
- Mrs. Mine Kaya Bezgin, EGPRN Secretary, e-mail: office@egprn.org
- Mr. Burak Usgurlu, EGPRN IT Manager, e-mail: burak@uskur.com.tr

This book is available on the EGPRN website: [www.egprn.org](http://www.egprn.org) - ISBN 978-90-829673-4-0

Instituto de Investigación Sanitaria Galicia Sur, 36002 Pontevedra, Spain. E-mail: santiago.perez.cachafeiro@sergas.es

Keywords: Process mining, clinical pathways, innovation

Background:
Within the national cancer care strategies, colorectal neoplasm (CRC) is a priority. In a prior experience in Madrid, only 27 out of 112 (24.1%) patients in a fast track diagnosis (FTD) pathway were diagnosed of CRC. Reasons why patients with CRC do not use FTD are still unknown. We hypothesize that new process analytics techniques, such as process mining, are ideal tools to identify more efficient circuits or clinical pathways in any pathology. We seek to redesign our FTD based on the results of process mining.

Research questions:
Is it feasible to use process mining for the evaluation of the efficiency of a Diagnostic Fast Track (DFT) of suspected colorectal cancer?

Method:
Through the process mining technique, a review of the existing DFT in the National Health System will be performed for the diagnosis of CRC suspicion in order to establish all the events that may be related to these processes. The DFT of our environment (Pontevedra-North Sanitary Area) will be analyzed, while new events that may be of interest for its incorporation into this DFT will be proposed. This new DFT will be incorporated in our center into the practice of care for a period of 18 months, after which the diagnostic process of CRC will be re-evaluated through a new process mining.

Results:
The process will be considered efficient if no new avenues of assistance have been generated outside the proposed DFT.

Conclusions:
The systematic proposal will constitute a new paradigm in the continuous evaluation of programs of early diagnosis and dynamics of collaboration between primary care and hospital care.

Points for discussion:
Process mining may be useful for the follow-up and redesign of clinical pathways

Presentation on 19/10/2019 09:10 in "Parallel Session H - EGPRN Special Methodology Session" by Helena Fernandez-Lopez.
